VAULT365 BAAS

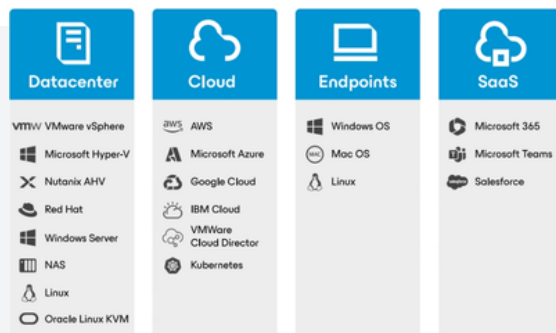

Fast, Secure Backup to the Cloud

Vault365 and Veeam® Cloud Connect make it seamless to route backups and replicas off-site without the overhead of managing a secondary infrastructure. Point your jobs to our enterprise BaaS environment in just a few clicks—no separate console required.

- **Ransomware-Proof Immutability:** Backups are write-locked and tamper-proof to ensure absolute recovery integrity.
- **True Data Sovereignty:** Stored locally in dedicated, sovereign infrastructure—giving you full compliance and governance without relying on third-party hyperscalers.
- **End-to-End Security:** Complete in-flight and at-rest encryption ensures your data remains private, compliant, and ready for instant recovery.

Backup Flexibility

Vault365's Backup-as-a-Service solution offers complete flexibility, enabling a variety of workloads to be protected. With various Datacenter, Cloud, Endpoint and SaaS providers integrating into our solution, we've got you covered.

Enterprise-Grade Backup and Recovery

VAULT365 BACKUP-AS-A-SERVICE FEATURES

MONTHLY BILLING

With our monthly consumption billing, you only pay for the data you use.

NO COMPLEX STORAGE TIERS

Avoid confusing bills with a simple pricing structure.

NO EGRESS CHARGES

Unlike other solutions, you won't be charged to restore your data from the cloud.

SEED DATA LOCALLY

Access your data in our private cloud location, enabling you to seed directly.

IMMUTABLE BACKUPS

Your data is protected by immutability, and cannot be altered or deleted.

RAPID RECOVERY

Veeam integration enables rapid recovery from any ransomware attacks.
